Chair

Alicia Cooperman, Assistant Professor

Participants

Applying the Extended Parallel Process Model to Understand Households' Responses to Tornado and Earthquake Risks in Oklahoma

Yueqi Li, SUNY Albany

Alex Greer, SUNY Albany

Tristen Wu, University of North Texas

Where Do You Turn to First for Information: The Role of Trust in Representative Bureaucracy for Emergency Managers and Their Publics

Wesley Wehde, Texas Tech University

Junghwa Choi, University of Nebraska Omaha

Building trust before the storm: Looking to the community and local government officials on how to repair damaged relationships after facing repeated hazardous events

Cassandra R Davis, University of North Carolina Chapel Hill

Evan Johnson, University of North Carolina Chapel Hill

The Differences between Joint and Individual Protective Action Decisions when Facing a Developing Tornado Threat

Zhang Hao, University of North Texas

Stander Barend, University of North Texas

Chih-Chun Lin, Jackson State University

Haley Murphy, Oklahoma State University

Tristen Wu, University of North Texas

Shi-Kai Huang, Jackson State University

Discussants

Sara Constantino, Northeastern University

Elise Pizzi, University of Iowa

This panel investigates how individuals and households make choices during disasters. Specifically, the papers explore how households respond to disasters across types of hazard risk, where individuals and emergency managers turn for information on local hazard risk, how individuals and households make different protective action decisions, and how household income potentially mitigates the stress associated with individual and dual disasters.

The Effect of Identity on Political Psychology

Thursday
8:00am-9:20am
Citrus Room

Political Psychology**Participants**

- Negotiating Identity: Socializing and Problematizing Puertoricanness
Teófilo Espada-Brignoni, University of Puerto Rico, Río Piedras Campus
- Black Lives Matter and Twitter: Can Social Media be Motivational?
Brian Eiler, Davidson College
Sophia Leavitt, Columbia University
- Gendered Norm Violation Accountability
Drew Cagle, University of Alabama
- I Am Who I Vote For: A Hierarchical Network Model of Party Identification
God'swill Osa, University of Texas at Austin
Kayee Zhou, LBJ School, University of Texas
Sarah Heise, University of Texas at Austin
Ajay Somaraju, Michigan State University
- The Political Meaning of Lifestyle Habits: Insights from the 2022 Quebec Election
Catherine Ouellet, University of Toronto
Yannick Dufresne, Université Laval
Hubert Cadieux, Université Laval
Nadjim Fréchet, Université de Montréal

3100

Elite and public opinion: Convergence or divergence

Thursday
8:00am-9:20am
Compass Room

International Conflict and Security**Chair**

David B Ebner, University of Southern California

Participants

- An Alternative Domain of Political Sophistication: Identifying International Relations Expertise in Survey Responses
Mark Crecenzi, University of North Carolina at Chapel Hill
Bailee Donahue, University of Pennsylvania
Anthony Lindsay, University of North Carolina at Chapel Hill
Eric Parajon, University of North Carolina at Chapel Hill
- Civilian Beliefs amidst Warfare
Daniel M Silverman, Carnegie Mellon University
Anna Pechenkina, Utah State University
Austin J Knuppe, Utah State University
- Interstate Conflicts Abroad and Domestic War Support: A Survey Experiment
Hugo Tai, University of Oxford
- The Blame Game: The Political Debates Over Who Lost the Wars in Iraq and Afghanistan
Kelly McHugh, Florida Southern College
- Who Follows Whom: Elite Responsiveness to Public Support for Nuclear Weapons
Kyung Suk Lee, Texas A&M University

Discussant

Kristyn Karl, Stevens Inst. of Technology

Through surveys and experiments, this panel analyzes how elite and public opinion diverge or influence each other.

War, Repression, and Human Rights

Thursday
8:00am-9:20am
Glades Room

Human Rights**Chair**

Christopher Michael Faulkner, U.S. Naval War College

Participants

Another Ethnic War: The Impact of Civil War Labels on Third-Party Humanitarian Interventions

Sidita Kushi, Bridgewater State University

Hold the Line, or Take the Initiative? Invasions and Territorial War Aim Expansion

Karen E Farrell, George Washington University

Ordered Chaos: A Dynamic Structural Approach to Mass Political Violence and Genocide

Zachary Karazsia, Valdosta State University

Rethinking America's Support for Syrian Refugees in Jordan

Andrew Patrick Sarff, West Point Human Rights Lab

CWC #15: Politics of Crises and Disasters**Thursday****Conference Within A Conference**

9:30am-10:50am
Banyan Brezeway
1

Chair

Tanya B Corbin, Embry-Riddle Aeronautical University

Participants

The Making of a Migration Crisis

Michelle Reddy, Sciences Po

Helene Thiollet, Sciences Po

COVID-19 and Absentee Voting

Bridgett A King, Auburn University

Natural Disasters in Peru: The Effect of Government Response on Migration and Violence

Elise Pizzi, University of Iowa

Sara Mitchell, University of Iowa

Making Sense of Climate Change: Natural Disasters and Environmental Attitudes in Latin America

Marija Verner, University of Colorado at Boulder

Discussant

Wesley Wehde, Texas Tech University

This panel explores the effects of disasters on political conditions, attitudes, and behaviors. Focusing on migration, one paper explores when and how migration becomes defined as a crisis in Europe. Another paper examines political outcomes from disaster response in Peru, and another paper investigates the ways in which experiences of disasters affect risk assessment and support for environmental protection. Finally, COVID19 absentee voting during the 2020 primary and general elections and the effects on voter confidence in elections is investigated.

The papers presented in this panel investigate local governmental capacity for disaster management. Two papers investigate local governmental participation in FEMA programs of the community rating system for flood risk, and receiving EMPG funds, which are the financial backbone of the U.S. emergency management funding nationwide. Another paper explores citizen willingness to pay for supporting local emergency management services. Another paper presents a model of the issues that impact local government financial coping strategies after Hurricane Harvey, showing that local governments with lower prior fiscal condition and greater hazard exposure will use more coping strategies. And a final paper examines the degree to which adaptation pathways can improve local flood risk management plans.

This roundtable offers practitioners the opportunity to discuss issues related to parliamentary support in developing democracies. Participants will address, among others, the design and inception of parliament support, the consideration of stakeholder needs and donor expectations, identifying an adequate response to reform opportunities, the alignment with standards and benchmarks for democratic legislatures, flexible management, and innovative activity implementation, peer-to-peer learning, the need for fostering ownership and stakeholder inclusion, and the importance of indicators for measuring results. Practitioners will provide insight into the intricate work of parliamentary support work in various jurisdictions around the globe and highlight where academic research and excellence can make practical contributions to the various stages in the program cycle. This roundtable is organized to reflect upon the current status of parliamentary support programs and opportunities for future collaboration and cooperation. The roundtable will encourage audience engagement and follow-up questions.

This panel considers civil-military relations (CMR) from a multitude of perspectives. The panel is composed of a diverse set of scholars from across the globe and from a variety of institutions.

Collectively, the panel challenges long-standing approaches to CMR research by reexamining canonical theoretical arguments and popular empirical assumptions about the conduct of CMR. Ben Sasson-Gordis reassesses the conventional wisdom among CMR scholars that "civilians have the right to be wrong" and instead argues military personnel have an obligation to eschew civilian orders that undermine democratic institutions. Genç Yılmaz confronts the widely-held assumption that militaries will actively push themselves into politics by instead showing how civilians "pull" the military into politics, with a special focus on Turkish civil-military relations. Kenwick, Kolcak, and Lee examine how veterans in the U.S. Congress differ in their use of rhetoric, testing popular assumptions about how military service matters for political elites. Muldoon pushes forward CMR theory by considering how the British military interacted with civil authorities in colonial society in India during WWII. Finally, Blankshain, Lupton, and Margulies reexamine the factors shaping confidence in the U.S. military, arguing that feminist attitudes are an important but unlooked factor driving confidence and support amongst the public.

The development and proliferation of international and domestic courts responsible for adjudicating human rights cases, along with traditional treaty mechanisms, have been one of the more positive developments of the human rights regime over the past few decades. The papers in this panel examine the various successes and disappointments of human rights courts and treaty mechanisms from public support for these institutions to their adjudicative processes to countries desire to withdraw their treaty reservations.

Political Theory

Chair

Constantine Vassiliou, University of Houston

Discussants

Lee Ward, Baylor University

Constantine Vassiliou, University of Houston

Peter McNamara, Arizona State University

Vincent Philip Munoz, University of Notre Dame

Brianne Wolf, Michigan State University

This Roundtable will bring together a panel of established and promising scholars specializing in the origins of liberalism to critique Lee Ward's (Baylor University) new book *Recovering Classical Liberal Political Economy: Natural Rights and the Harmony of Interests* (Edinburgh University Press, 2022). This attempt to recover the rich, multifaceted dimension of British classical liberal political economy includes chapters on the political economy of Thomas Hobbes, John Locke, Bernard Mandeville, David Hume and Adam Smith, Thomas Paine, John Stuart Mill and a concluding chapter illuminating how British classical liberalism attempted (largely unsuccessfully) to address the problem of imperialism and the subjection of women. For decades, Ward's research has examined the philosophical foundations of the early modern liberal political thought. In his most recent book, and fourth monograph, Ward explores the most influential texts, thinkers, and concepts in the British tradition of classical political economy, and he argues that much of contemporary neo-liberal political economy is rooted in a problematic interpretation of classical liberalism in the early modern period. In this provocative theoretical reconstruction of 17th-19th century classical liberalism, Ward challenges the dominant interpretive paradigm established more than a generation ago by Albert Hirschman, C.B. Macpherson, J.G.A. Pocock and Louis Dumont which interprets the history of liberalism as a narrative about how early modern political economy made possible the emergence of homo economicus and the autonomy of economic discourse from the traditional moral categories of political philosophy. Uniquely among studies of this type, *Recovering Classical Liberal Political Economy* situates the political dimensions of early modern British political economy in two distinct, but related, strands of liberal thought often viewed in isolation—natural rights philosophy and harmony of interests theory. In Ward's rendering classical liberalism cannot be reduced to the laissez-faire doctrine, and rather must be understood in terms of a distinctly liberal conception of statecraft and practical reason. This Roundtable will be of interest to scholars and students of the history of liberalism, as well as the history of political economy. The participants in the Roundtable will include Peter McNamara (Arizona State University), Vincent Philip Muñoz (University of Notre Dame), Brianne Wolf (Michigan State University), and Constantine Vassiliou (University of Houston), with Lee Ward (Baylor University) as a respondent. This diverse group of scholars are all experts in the subject of the history of liberal political thought and political economy, who reflect a variety of methodological approaches and specific research foci. Given the continuing relevance of thinking about the challenges confronting liberal democratic states in the age of neo-liberal orthodoxy, political polarization, and economic globalization, the opportunity to assemble such an outstanding collection of scholars in this Roundtable promises to be a venue for a fruitful exchange of ideas and constructive dialogue that will benefit the author and the audience immensely as we reconsider our assumptions about the liberal theory of government and political economy.

In the 21st century, higher education outreach and engagement has been prioritized by university leadership, various disciplines and fields of study, as well as external stakeholders, such as policymakers and professional associations. Continued challenges associated with disaster and hazards management, compounded by the realities of climate change, create new opportunities and demands for outreach and engagement. This roundtable will begin to explore recent university experiences in this regard. Scenario planning, service-learning, technical assistance, continuing education, and multi-university collaborations are but a few examples. Panelists will highlight best practices, the challenges involved, and future directions in service to communities and governments. The panel will seek to identify current and potential areas for research and inquiry.

In October 2022 the US Supreme Court heard the Alabama case of *Merrill v. Milligan* in which African American voters sued the state to create a majority-Black district under the Voting Rights Act. Despite consistent increases in the Latino, Black and Asian populations, racial representation has been slowed in recent years due to conservative efforts to rollback or eliminate the Federal VRA. Now, in June 2023 the Supreme Court will issue a ruling on the future of the VRA in the *Merrill* case. This panel brings together legal scholars, political scientist who serve as expert witnesses, voting rights attorneys, and map drawers to discuss what is at stake in the *Merrill* decision and what the future of voting rights may hold in 2023 and beyond.

In 2021, Freedom House noted that democracy in America had declined precipitously over the previous decade and noted: “the United States is now facing an acute crisis for democracy” (see: “From Crisis to Reform: A Call to Strengthen America’s Battered Democracy, 2021”). From the January 6, 2020 insurrection at the U.S. Capitol, to escalating threats to poll workers and elections officials, to ongoing legislative efforts to limit civics education, threats to American democracy abound. In this roundtable discussion, panelists from a diverse set of institutional contexts will discuss the challenges and opportunities for integrating hands-on, pro-democracy content into their teaching and work with students. Pedagogies and activities that will be discussed include classroom simulations, hyperlocal campus engagement using student and peer-driven strategies, and service learning and community engagement. Attention will also be given to the ways in which teacher-scholars can frame these activities as part of their annual review and/or for tenure and promotion. As a roundtable discussion, audience participation and engagement will be highly encouraged.

What is the Political South?*Thursday***American Political Development***12:30pm-1:50pm**Horizons West***Chair**

Mark J. Rozell, George Mason University

Discussants

Charles Bullock, University of Georgia

Keith Gaddie, The University of Oklahoma

Susan MacManus, University of South Florida

Jeremy Mayer, George Mason University

What Is the Political South? Panel: Charles S. Bullock III - University of Georgia Ronald Keith Gaddie - University of Oklahoma Susan MacManus - University of South Florida Jeremy D. Mayer - George Mason University Mark J. Rozell - George Mason University The purpose of the panel is to gather these collaborators to report progress on a proposed book project on the evolution and diffusion of the political south. The south traditionally is presented as the eleven states of the former Confederacy, although significant portions of states bordering the south are often seen as more "southern" in their politics and culture than even some of the traditionally southern states such as Florida and Virginia. Furthermore, the US Census Bureau defines the south as inclusive of several MidAtlantic states. Thus, we raise the question: "what is the political south?" Has the transformation of much of the south economically, culturally, and politically made the region generally no longer distinctive? Will the children of the panelists' current students even be studying and taking classes on southern politics in the future? Or, is the concept of the political south merely encompassing a different geography than the traditional definition of the region? How should the political south be defined and analyzed in light of substantial change? We have authors with expertise in states that are portrayed by many as not authentically southern (FL, VA), or appearing to begin to transition politically and culturally (GA, TX), and of non-southern states that have a lot in common with the political south (OK, KY), among others. Our current thinking about this project is to have each author initially present a state-specific or subregional focus: Bullock (GA), MacManus (FL), Rozell (the key MidAtlantic region states - VA, MD, NC), Gaddie (OK, KY), and Mayer will describe and analyze the broader topic of "The Diffusion and Evolution of Southern Political Culture" based on polling data that reveal the least southern of the southern states, and the most "politically southern" outside the south, which will be inclusive of states not covered in the state and regional case studies. Four of the panelists since 2018 have collaborated on two book projects on the evolution of the south, black statewide candidates in the south, and have a nearly completed manuscript on rising minority and women's political power in the south. Gaddie is joining the collaboration for the proposed fourth project.

Less than century after Kant had identified his own day as "an age of enlightenment," Nietzsche pronounced the modern world to be in state of crisis with Zarathustra's infamous declaration that "God is dead." This panel explores key questions and features of Nietzsche's revolt from Kant's self-confident modernity, including his teaching on history, power, the eternal return, and the revaluation of all values.

Cassandra R Davis, University of North Carolina Chapel Hill

Elizabeth Dunn, University of South Florida

This panel provides the opportunity to critically explore a new book addressing the operationalization of community resilience in the United Kingdom (UK) in connection with severe floods. Patel shares lessons learned and his research findings on the educational and practical meaning and application of community resilience using a UK-centric local-level case study. Exploring the perceptions of both those who have been affected by a natural hazard and those who have not, Patel finds and argues how trust, community resources, and neighborhood security can offer effective ways of bringing communities together after a natural hazard. This panel includes a brief presentation by the author of "Community Resilience When Disaster Strikes: Security and Community Health in UK Flood Zones", followed by a discussion from a diverse panel of scholars who have worked in disaster politics and public health research.

Viewpoint Diversity in Political Science*Thursday***Teaching Political Science***2:00pm-3:20pm**Bird Key***Discussants**

Lonna Atkeson, Florida State University
 David Barker, American University
 Matt Grossman, Michigan State University
 Andrew Taylor, North Carolina State University

This roundtable is proposed by Andrew J. Taylor, Professor of Political Science at North Carolina State University and co-leader of Heterodox Academy's Political Science Community. Participants on this roundtable will discuss issues related to viewpoint diversity within the political science profession. Several studies suggest political science professors generally have, regardless of institutional affiliation, rank, and demographic characteristics, left-of-center personal politics and that a significant majority are Democrats. To what extent are these observations accurate and confirmed by systematic analysis? Even if this is true, does it matter? Is it more important for political science to have a politically diverse profession than other disciplines, including other social sciences? If viewpoint diversity matters in political science, how does it matter? Does it affect our collective capacity to advance knowledge? Does it make our research incomplete or unbalanced in some way? Does any lack of viewpoint diversity undermine public confidence in our work? Does it make our teaching less effective? If we are concerned the profession lacks viewpoint diversity in a political sense, is there anything that should or can be done about it?

Discussants

Christopher Wolfe, University of St. Thomas
 William McCormick, SLU
 James Patterson, Ave Maria University
 Justin Brophy, Providence
 Paul DeHart, Texas State University

In "The Christian Structure of Politics: On the De Regno" of Thomas Aquinas, McCormick offers a careful study of a relatively overlooked book of the Church Father's, arguing that De Regno is an essential component of Thomistic political theory. Further, he explores the salience of de Regno for contemporary times. In this roundtable, McCormick engages with the questions and critiques of some of his "critics", scholarly interlocutors who are careful students of St. Thomas

This panel considers how international and national organizations and communities participate in disasters during the response and recovery, and how this participation contributes to changes in resilience and policy preferences of those affected by disasters. These studies consider environmental changes from climate change, and the ways they are perceived by affected communities, and how they are responding to these challenges. From building resilience in organizations, developing food security frameworks, participating in response and recovery, these papers investigate how communities are responding to disasters and risk.

This panel brings together scholars who use historical and interdisciplinary perspectives to investigate neglected areas in American political life. Their work problematizes American political development conceptual frameworks by drawing attention to the ways that political and social identities are forged and embedded within layered cultural, historical, and global contexts. The papers respectively investigate the international turn in American Political Development; policymakers who imagined emergent welfare agencies as sources of national strength and defense; and a theorization of the role of comic book culture and 'the comicene' as a linkage which connects political time with contemporary social movements.

This panel explores the contribution that literature makes to our understanding of politics. Political actors, real and fictional, are illuminated in their complexity through literary depictions. Offering analyses of dramas, a novel, and an autobiography, this panel will consider the unique perspectives provided by these different literary forms. We will begin with an examination of Shakespeare's depiction of sacrifice and devotion to family and country in Henry VI, Part 1. Next, we'll analyze a characterization of one of this country's founders, Benjamin Franklin, in Melville's *Israel Potter*. We'll follow up by looking at Franklin's own *Autobiography* and consider the role of faith in Franklin's views. Finally, we'll consider a poet's view of his own superior understanding of all things political in Aristophanes's *Clouds*, *Birds* and *Thesmophoriazousae*.

Western countries face a current era of ideological ferment and discontent, both expressed in popular and elite forms. This panel showcases papers on intellectuals, ideas, ideologies, and behaviors that have emerged in recent years, which are inchoate but growing in both variety and popularization. This is termed variously, with some coining such developments as a kind of ‘postliberalism’ or ‘illiberalism,’ while others prefer to reference ‘dissident’ strains on the Right and Left of the shifting ideological spectrum. The panel provides a look at postliberalism in several ways: as expressed through the curious rise of esoteric Catholic integralism and Old World Reaction (Patterson); as an ongoing theoretical and philosophical dispute between ‘right-liberal’ and ‘postliberal’ theoreticians (Addison); as a descriptor of a changing world order (Kochin); as a modern form of esoteric messianism known as ‘accelerationism’ (Ofek); and as a cross-continental reaction of discontent expressed distinctly in the Anglo-American world and in places less fully captured by political and cultural liberalism (Waller). In doing so, the panel allows us to engage in theoretical, conceptual, and empirical discussions from a variety of perspectives, all seeking to better understand the ideational changes occurring across many states of the broader West.

Discussant

Alexander Kustov, University of North Carolina at Charlotte

The papers on this panel examine issues related to refugees, conflict, and security across borders. Khoury and Siegel explore how Syrian refugees engage in organized civil action from abroad using a variety of new data and methods. Blair et al. estimate the effects of humanitarian migration on conflict using new granular data on the location of refugee settlements. Coltman-Cormier et al. propose and test a theory on the role of gender in border security attitudes using a survey experiment. Finally, Simmons and Pinson examine the relationship between border security policies and human trafficking in a new global, geocoded dataset.

Jesus Rojas Venzor, University of California San Diego

Discussant

Hannah Alarian, University of Florida

The papers on this panel use experimental and/or survey data to explore attitudes toward immigration and toward foreign aid as a strategy to reduce migration. Kustov tests the possibilities for getting pro-immigration voters more politically engaged using information campaigns in a series of survey experiments. Simon et al. examine whether the US public is less willing to increase immigration when bundled with foreign aid policies. Finally, Venzor studies how right-wing governments allocate foreign aid depending on migration flows and regime type.

This panel will bring together four articles exploring the theoretical foundations of political community. Peter Haskett (Catholic University of Washington D.C) will approach the topic by attempting to resolve the seeming contradiction between the Athenian Stranger's discussion of the tyrannical founder in Plato's Laws and the critique of tyranny in the Republic. This will speak to contemporary controversies regarding the importance of great founding figures, whether mythical or historical, to political communities. March Ashford (University of Concordia) will offer a divergent position, arguing that Socrates' travails at the hands of Athenian democracy in the Apology demonstrate that political communities are founded upon public opinion, with "great" figures either swept along or crushed under foot. Leaving the ancient world for the modern, Marcus Charlesworth (University of Ottawa) will turn to Heidegger's discussion of the relationship between politics and philosophy, making the case, employing Ernst Vollerath's *die Politik- das Politische* distinction, that Heidegger's thinker can not be a philosopher-king, and therefore philosophy can not provide a foundation for political community, because the thinker must occupy a complicated position, vacillating between *die Politik* and *das Politische* without becoming entangled in either. Finally, Ben Woodfinden (McGill University) will discuss Grant's Lament for a Nation, speaking to contemporary themes of continentalism, anti-Americanism, and oikophilia as competing foundations of contemporary Canadian political community. These four papers will interact with one another, putting into conversation contradictory positions on the political and ideational bases upon which political communities, both ancient and modern, construct and sustain themselves.

Discussant

Miranda Simon, University of Essex

The papers on this panel use a range of methods to introduce new data and examine historical and current discourse about migration. Wong provides new evidence on the US public attitudes toward the “great replacement theory” based on original survey data. Lim examines South Korean attitudes toward a recent wave of Yemeni refugees using text analysis of social media data. Finally, Kustov et al. introduce a new dataset of academic attitudes toward immigration and explore their historical change using text analysis of available social science articles on the issue.

This event will offer an opportunity to discuss the most recent trends in world development with regard to the rise of powerful executives and legislative decline in many countries of the world. What explains the recent inability of national legislatures to check the growth of executive power? Why do some democracies do better than others? We will discuss historical legacies, institutional design; economic factors; external factors; political polarization; the personalization of the politics, and random, exogenous “shocks,” and the other factors that may explain these developments.

M.P. Broache, UNC Greensboro

The Covid-19 pandemic opened the door for significant human rights abuses from governments using the pandemic as an excuse to institute repressive measures and/or inadequately providing resources to populations vulnerable to the virus. Although the scope of the Covid-19 pandemic made the opportunities for repression more widespread the violations and vulnerabilities associated with the pandemic were nothing new. The papers in this panel explore the violations and repression brought on by Covid-19 but also explore the vulnerabilities of health care workers in Syria and the use of pandemics as an excuse for anti-immigrant rhetoric and policy in the U.S.

Scott L Greer, University of Michigan

Discussants

Andre Lecours, University of Ottawa

Rebecca Oliver, Allegheny College

Margitta Mätzke, Johannes Kepler University, Linz

Mark Vail, Wake Forest University

Scholars and practitioners have long asked what federalism does to public policy and the welfare state: does it increase generosity? Decrease it? Promote experimentation and learning? This authors-meet-critics discussion features a newly published contribution to the debate, *Putting Federalism in its Place: The Territorial Politics of Social Policy Revisited*, by the international team of Scott Greer (Michigan, USA), Daniel Béland (McGill, Canada), André Lecours (Ottawa, Canada) and Kenneth Dubin (IE, Madrid) and published by the University of Michigan Press. The authors draw on comparative data and extensive case studies of Belgium, Canada, Spain and the USA to argue that federalism needs to be understood as an institution which can only be analyzed in light of its configurations with other variables including nationalism, policy legacies, and other institutions. The critics, Janet Laible (Lehigh University, USA), Margitta Mätzke (Johannes Kepler University, Austria) Rebecca Oliver (Allegheny College, USA), and Mark Vail (Wake Forest University, USA), will discuss its strengths, weaknesses, and place in the literatures on federalism, policy, and comparative politics.

The papers on this panel explore how migration and borders influence electoral politics and public policy in a range of contexts. Alarian and Fahey combine party manifestos with survey data from Europe to examine how far-right parties manage to attract immigrant voters. Woldemikael provides new comprehensive evidence on the electoral effects of Venezuelan migration in Colombia. Whitaker and Wellman compare survey data from within Kenya and in the diaspora to examine emigrant participation in the 2022 election. Pauselli and Simmons examine how border hardening influences health outcomes in border zones around the world.

Parliaments in Crises

Author Meets Critics: Creating the Law: State Supreme Court Opinions and The Effect of Audiences, by Michael Romano and Todd Curry

Friday
 3:30pm-4:50pm
 Banyan Room

Judicial Politics**Chair**

Mark Hurwitz, Western Michigan Univ.

Participant

Author Meets Critics: Creating the Law: State Supreme Court Opinions and The Effect of Audiences

Michael K Romano, Shenandoah University

Todd Curry, University of Texas at El Paso

Discussants

Lisa Holmes, University of Vermont

Rebecca Gill, University of Nevada, Las Vegas

Joseph V. Ross, Florida Gulf Coast University

Marcy Shieh, University of Wisconsin-Madison

In *Creating the Law: State Supreme Court Opinions and The Effect of Audiences*, Michael Romano and Todd Curry analyze how state supreme court judges communicate with external audiences, including lawyers, public officials, journalists, other judges, and the public. In doing so, they show how institutional arrangements and variation in state courts affect judicial decisions. Further, they demonstrate the manner in which the language employed by judges is associated with judicial outcomes. In this author meets critics panel, panelists will critique how Romano and Curry bring to bear audience- and representative-based theories to explain judicial behavior, as the panel discusses the book's argument and conclusions.

Public Health Education

Friday
 3:30pm-4:50pm
 Bird Key

Teaching Political Science**Participants**

Cross-Disciplinary Teaching: Life Science & Public Policy

Discussants

Kody W Cooper, University of Tennessee at Chattanooga

Micah Joel Watson, Calvin University

Christina Bambrick, Notre Dame

Justin Dyer, University of Missouri

James Patterson, Ave Maria University

Kody Cooper (UT Chattanooga) and Justin Dyer (Missouri) have co-authored *The Classical and Christian Origins of American Politics: Political Theory, Natural law, and the American Founding*, coming out in August 2022 from Cambridge University Press. The authors contend that the early American political tradition was, contrary to the contemporary academic conventional wisdom, more heavily influenced by Christian and natural law sources than modern philosophy. This "meet the authors" round table will offer a critical and constructive assessment of that central claim and its relevance to the current political moment which is more diverse and secular than the founding era.

How does human character affect the way one perceives politics, and, vice versa, how do political institutions and structures affect the character of those living under them? This panel turns to Aristotle and those working with his concepts to explore how things like natural disposition, habituation, civic engagement, and moral virtue shape the relationship between the individual and the political community.

Public security, including internal conflict, violence, and policing, is a salient issue and an increasingly important topic in Comparative Politics literature. In this panel we discuss four topics of particular relevance to Latin America and the Global South. First, we engage in the discussion between citizens and the security forces. Albarracín and Tiscornia touch on how citizen trust in police forces in Colombia is affected by the perceived targets of police violence. Related to this topic, Tellez & Villamizar Chaparro examine the economic re-integration of ex-combatants following protracted internal conflict in Colombia. Our panel then focuses on how political competition is affected by public security issues. First, Trudeau provides a new theory of candidate-criminal collusion in Brazil, as a strategy employed by political elites to gain votes in criminally-governed territory. Also focusing on Brazil, Laterzo shows how political candidates engage in strategic issue mixing related to public security to maximize their chances of election. These four papers provide not only important theoretical and empirical contributions to the Comparative Politics literature, but also advance findings that are important to debates regarding democracy and public security policy-making globally.

As research continues to show the valuable impacts of experiential learning in political science (Bradberry and DeMaio 2018, for example), Model United Nations has become one of many ways that instructors can enhance student learning. With research exploring some of the ways in which model UN can be incorporated into the classroom (Engel, Pallas, and Lambert 2017; Hammond and Albert 2019), this panel proposes a discussion oriented around our collective experiences teaching model UN in a variety of schools and situations. Topics to be discussed include model UN both in a classroom and an extracurricular club setting; strategies of teaching and learning; the availability of regional and national model UN conferences; and things to think about when taking students to a conference. The goal of the panel would be to provide real life examples of how we have incorporated, taught, and facilitated our students' participation in model UN, practical considerations, and the benefits to our students in the process.

Discussants

Sharon Austin, University of Florida

Baodong Liu, University of Utah

Christina Haynes, The Pennsylvania State University

Stefanie Chambers, Trinity College

The unexpected shift from the election of Barack Obama and the post-racial hope to the racial confrontations in the Trump era begs the question: Why did such a big volatile swing happen in such a short period of time? Uncertainty reigns in volatile political times. Baodong Liu's new book, *Political Volatility in the United States*, aims to provide a systemic model for understanding how political volatility throughout the U.S. history has had its root in two competing racial and religious groupings. Moreover, the groupings grounded in white supremacy and egalitarianism have collided, contested, and facilitated the configuration and reconfiguration of the atomic political structure. In this panel, political scientists from University of Florida and Penn State will discuss how this book provides an account rooted in structural tensions, strategic imperatives, opportunities, and threats on collective actions.

This panel of scholars addresses a range of contemporary issues that have arisen within the field of International Studies that will impact their generation and those well beyond Gen-Z. Global forces unleashed in earlier eras have had unintended as well as anticipated consequences that are now threatening to push past weakening thresholds. Each of these papers wrestles with contested realms of freedom of choice within structures that have been resistant to changes that would generate more positive outcomes for a greater majority. Cameron Cheatham looks at how the degree of global financial power afforded to women may be a result of local patriarchal structures that limit women's fundamental human rights. Savannah Williams demonstrates how the depictions of women have reinforced gender stereotypes, thus thwarting the expansion of substantive equality even in Western societies. Shallbe Eubanks argues for a more progressive and transparent approach to pharmaceuticals and controlled substances which questions the motivation of Big Pharma and their corporate lobby. Quinna Eldridge brings much-needed attention to the widespread institutional abuse that occurs in foster care systems where bureaucratic box-checking supersedes child welfare. Sayanna Bautista finds that community-based development is a more effective strategy for NGOs, but only if they are willing to partner with the local population to implement much-needed social programs. Cameron Cagle examines how short-sighted climate policies have impacted poor and at-risk communities and what might be done to turn the tide of global warming. Lastly, Gabriel Harper examines the degree to which Kazakhstan can exercise its autonomy in the sphere of Russian regional hegemony. Throughout each of these papers, the authors seek to frame how the structures created by more powerful forces have given rise to present injustices that more vulnerable groups must overcome in order to achieve a degree of agency sufficient to promote a more equitable and prosperous future.

By the time of Donald Trump's inauguration in 2017, the U.S. Senate had existed for more than 225 years. Over the course of that history, the Senate changed and developed as it confronted new situations, as it was comprised of different individuals, and as it reacted to other political actors and institutions. This panel will explore through 5 papers whether the Senate, which considers itself a continuously serving legislative body, was disrupted during the Trump era. If so, in what ways and why? If it wasn't disrupted, how did the Senate persevere amid President Trump's divisive practice of politics, the growing polarization between the parties, and the even faster growing negative partisanship?

As polarization and political incivility grow in the United States and globally, there is increased public and scholarly attention to the way people share political ideas and identities through their encounters with each other. Political conversation is alternately seen as both cause and consequence, disease and cure, in relation to broader changes in political cultures and institutions. This panel brings together a diverse group of scholars to share cutting-edge research on political conversation, from a variety of theoretical and methodological perspectives. The research collectively explores the causes, content, and consequences of political interactions among everyday citizens, in both online and in person settings across multiple countries.

The administrative and legal framework girding environmental policies at both the federal and state levels condition the prospect for renewable energy and sustainability within the United States. This panel examines the treatment of water and air quality standards, how our regulations shape our national advantages, and the various approaches taken by states to adopt environmental practices.
